

Basset Psychological Services Insurance Information

Basset Psychological Services is a self-pay organization, accepting cash, check, most major credit cards, and HSA accounts. **Payment is due at the time of service.** Basset is not currently an “in-network” provider for insurance companies, and **does not submit claims** directly to insurance companies.

However, some of our clients choose to submit out of network claims for their services with us. Clients using this approach pay for sessions at the time of service and then receive reimbursement for therapy services directly from their insurance companies. **Please check with your provider to find out about your out-of-network benefits.***

If you would like to use insurance in this manner, we will provide you with billing statements that can be submitted to your insurance company. These billing statements are called “Superbills” and can be processed for our clients within 5 business days of requesting them.

***Questions to ask your insurance company:**

- Do I have out-of-network benefits for psychotherapy with a licensed psychologist, licensed professional clinical counselor (LPCC), or licensed independent social worker (LISW)? What are the benefits?
- Do I have out-of-network benefits for services with a provider who is under supervision of a licensed psychologist, LPCC-S, or LISW? What are the benefits?
- Is there a limit to the number of sessions I can use under these benefits?
- What percentage of the service fee is covered?
- Do I need to submit any forms to use my out-of-network benefits?
- Are Telehealth Sessions reimbursable?
